## Experience

August 2019 - November 2019

**Western Sydney Local Health Services, Westmead** – *Mobile App Development, REST API Development, Testing*

- Primary objective is to use React Native to build an app displaying the emergency department data which is currently built for a desktop with Qlik Sense. Done to provide greater accessibility of data for quicker logistical responses.
- Primary responsibility is to test the whole system (used Jest for mobile testing and PyTest with for server testing) and develop a server which serves the data to the app (used flask).
- Capstone internship organised by the university.

August 2019 - November 2019

**ANZ, University of Sydney, ANZ office (Pitt Street)** – *Design Implementation*

- Primary objective is to analyse the implication of open banking.
- My responsibility was to analyse the feasibility of implementation and generate a proof of concept. Used Figma for prototyping and Balsamiq for wireframing.
- Final prototype available at <https://www.figma.com/proto/0kvXqs5IC28YAX3rm1skhf/ANZ-Project?node-id=9%3A0&scaling=scale-down>
- Multi-disciplinary unit organised by the university.

August 2017 - Current

**Rocketboy Pizza, Potts Point, Randwick, Maroubra** – *Delivery, Customer liaison, Pizza prep, General help*

- Started as a delivery driver at the Potts Point store and progressed to take multiple responsibilities.
- Built a web page with React JS to help replace manual ordering of the food needed to prep.
  - Can be viewed at <https://ab1kenob.dev/my-app>
  - Use Google Sheets as CMS to help update the items quicker.
  - Designed to be used with iPhones.

## Education

August 2016 - July 2020

**University of Sydney, Sydney** - *Bachelor of Computer Science and Technology.*

## Skills

Some of my technical skills are listed below

Programming languages

- Backend: Java, Python, C, C++,
- Database: PostgreSQL and MySQL.
- Front end: HTML, CSS, JavaScript and R.

Frameworks

React, Hadoop with Apache Flink, android/iOS development with React Native and Qt for desktop applications.

Additional Familiarity with Node JS environment and Salesforce CRM.

Testing Tools

Familiar with Jest, PyTest, QTest, JUnit test and Apache Benchmark (for server performance).

Design and prototyping Tools

Familiarity with: Figma, Balsamiq, Adobe XD. Additional experience with Adobe Photoshop.

## Hobbies

Some of my casual hobbies are playing chess and the guitar.
